Roger Arnold

YOUR PARTNER FOR SUCCESS

Let Roger Arnold's **Economics** be your partner for success. With innovative new pedagogical features, increased coverage of globalization, easy customization, and fully integrated digital options, **Economics** may be your perfect solution. Packed with intriguing pop culture examples, the text illustrates that economics is both a huge factor in how the world works, and an integral part of the day-to-day experiences of the average college student.

What Matters to You in the 9th Edition?

Office Hours

This new feature seeks to emulate the kinds of questions you bring to Economics instructors after class. *Office Hours* explores key concepts such as how the money supply works; the purpose of the PPF; marginal revenue and marginal costs; and the purpose of the AD/AS framework.

Enhanced Globalization Coverage

This chapter has been significantly expanded, revised and updated. It now offers a total picture of how globalization affects the U.S., and how economies interact throughout the world.

Many New Applications

The Ninth Edition of *Economics* includes many new applications in the proven favorite—Economics 24/7 features. Here are just a few of the applications that are new to the Ninth Edition, demonstrating Arnold's emphasis on current events that are relevant to your lives:

Enhanced "Thinking Like an Economist"

This classic feature now rotates through the narrative along with two new features: *Finding Economics* and *Common Misconceptions*. Incorporating *Thinking Like an Economist* into the narrative of each chapter helps to better emphasize the importance of developing this skill—to view the world through the lens of economic analysis.

- **Finding Economics** illustrates the economics around us, such as how a technological advance in farming may end up resulting in more attorneys, accountants, or teachers.
- **Common Misconceptions** illuminates murky questions like whether one person's profit is another person's loss, and whether the wealthy really pay a lower percentage of taxes than others.

- Which is better, a tax rebate or a tax bonus?
- Is economics at work in the plastic surgeon's office?
- What economic concepts are illustrated in the popular ABC television series, *Lost*?
- Is the law of demand at work for iPods?
- How can we accurately compare GDP between different countries?
- How does the government spend taxpayers' money?
